

1. General information

This site is best viewed using 1024x768 screen resolution and has been tested with Internet Explorer 8, FireFox and Chrome.

1.1 Browser settings

1.1.1 Authorization modal windows

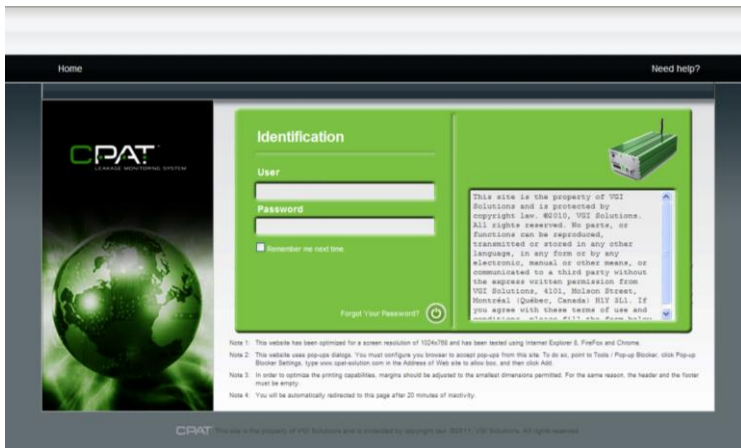

This site uses non-modal windows (pop-up). Please configure your system to accept blocker for this site by adding **www.cpat-solution.com** to the list of allowed sites.

1.1.2 Adjusting Print Settings

To optimize printing, margins should be adjusted to the smallest size possible. For the same reason, the header and footer should be empty.

1.2 Access to CPAT

<http://www.cpat-solution.com/CPAT/default.aspx>

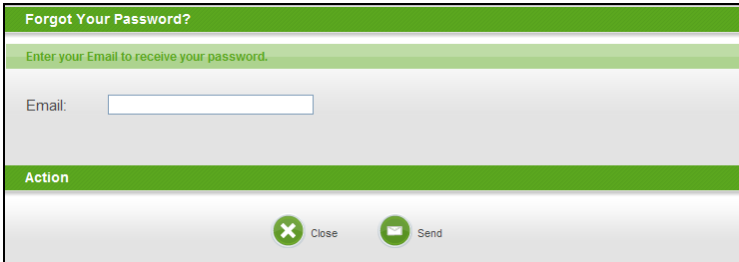

A user name and password were assigned to each user to protect customer data. This information must be recognized by the system to access CPAT. It should be noted that access to certain features of CPAT is determined by your network operator.

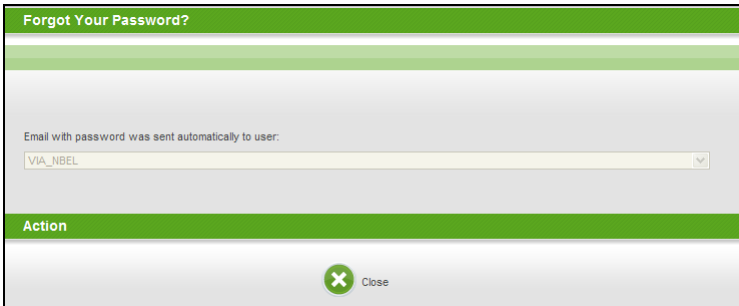

Caution: After a certain period without operation, the access will be disabled, the user authentication will be needed to regain access to CPAT. This period is defined in the system configuration, the default value is 20 minutes.

1.3 Forgot Password

It is possible by using the "Forgot Password" to receive an email with your password. The email address must be the one used to create the account.

For security reasons, only the password is sent via email, so the following window will remind you of your username. It is important to note it, it will not appear in the email.

The email content is as follows :
